Lions Eye Institute for Transplant and Research (LEITR) has streamlined the preparation and sterilization process to provide premium sterile allografts with an optimal safety profile at a competitive cost.

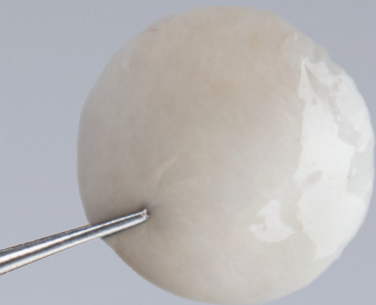

1410 N 21st Street, Tampa, FL 33605-5313 | 813.289.1200 | lionseyeinstitute.org

OptiGraft™

Sterile Ophthalmic Allografts

Clear Cornea Half-Moon
Split Thickness

Scleral Disk, 10mm

Optimal Convenience

- Improved packaging designed for ease of use
- Ready-to-use tissue without re-hydration or rinsing
- Up to two-year shelf life at room temp for scheduled or emergency cases

Optimal Cosmesis

- Clear cornea expands placement options (FOV, inferior, visible)
- Facilitates glaucoma tube management and allows for suture lysis

Optimal Tissue Integrity

- Proven tissue integrity and durability

Optimal Safety Profile

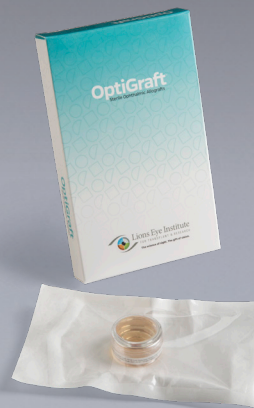

- Terminally sterilized to a sterility assurance level of 10^{-6}

Optimal Savings

- Significant cost savings from efficient operational design
