

Slingicator™

SLING OVERLOAD SYSTEM

Seeing is Believing.

*A High-Performance
Synthetic Sling with
a Critical Difference!*

Slingdicator™

SLING OVERLOAD SYSTEM

Slingdicator™ is a high-performance synthetic sling with a critical difference—a unique overload indicator cuff* which immediately shows the operator that the sling has exceeded 1.25x Working Load Limit (WLL).

OVERLOAD CUFF

- Durable, real-time overload indicator cuff alerts you immediately—not after the lift.
- Highly visible from 360 degrees.
- The most accurate sling overload indicator in the industry.
- Design factor minimum 5x Working Load Limit (WLL), which means 3.75x WLL remains *after* overload cuff “pops” open.
- Fast serviceability: repair/recalibration of overloaded sling if less than 2x WLL (condemnation of sling if load exceeds 2x WLL, as confirmed by secondary internal proof load indicator).
- Fast and easy compliance inspections.
- No fragile fiber optic components which may falsely indicate failure.

Honeywell
Spectra® fiber

SLING

- Proof tested to 2x WLL (vertical).**
- Made in the USA with custom craftsmanship.
- Constructed with high-performance Honeywell Spectra® fiber.
- Abrasion-resistant bulk nylon outer sleeve, polyester inner sleeve.
- Custom lengths/configurations as required by your lift plan.
- Accurate & consistent matched lengths are the result of precision control during manufacturing.
- Minimum 5:1 design factor; 7:1 available.
- Low stretch—approximately 1% at rated load.
- Lightest strength-to-weight ratio for all types of slings.

*Protected by U.S. Patent No. 8,256,810
**400K & 500K to 600,000 lbs.
Materials & Specifications subject to change

Available with
or without
Protective
Jackets.

Repositionable
Load Bearing Pads
are standard.

Our slings are constructed with high-performance Honeywell Spectra® fiber encased in a polyester inner and bulk nylon outer sleeve.

Slingdicator™ equipped synthetic slings are available in widths ranging from 2” to 12”, and vertical lift capacities from 20,000 lbs. to 500,000 lbs.

Jackets may be permanent, or removable (secured with hook & loop strip)

Each sling is individually tested and certified.

Patented Overload Indicator Cuff “pops” open when sling exceeds 1.25x WLL (shown in normal condition).
